

SCHOOL OF NURSING
BACHELOR OF SCIENCE IN NURSING

Program Description

36 Months –120 Semester Credits

The Bachelor of Science in Nursing (BSN) program develops the student's ability to analyze and apply research and evidence-based practice models into various healthcare environments. Through the application of theory, research, and translation of outcomes, the student will analyze clients, community, public health, technology, aging, and vulnerable populations with a focus on healthcare quality, safety, and improved outcomes. This program prepares the successful and licensed graduate for an entry level position as a registered nurse at the bachelor's degree level.

End of Program Student Learning Outcomes

Upon completion of this program, the graduate will be able to:

1. Apply knowledge of liberal education into nursing practice
2. Demonstrate interprofessional leadership and communication skills to effectively implement safe and quality care in an evolving healthcare delivery system
3. Integrate evidence, clinical judgment, interprofessional perspectives, and client preference in planning, implement and evaluating outcomes of care
4. Use technologies to assist in effective client care in a variety of healthcare settings
5. Explore the impact of socio-cultural, economic, legal and political factors influencing healthcare delivery and practice
6. Use interprofessional communication and collaboration skills to deliver evidence-based, client- centered care
7. Use evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan
8. Demonstrate the professional standards of moral, ethical, and legal conduct
9. Conduct comprehensive and focused physical, behavioral, psychological, spiritual, socioeconomic and environmental assessments of health and illness parameters in patients, using developmentally and culturally appropriate approaches
